<b>1. MAQSAD</b>	<b>1. PURPOSE</b>
<b>1.1</b> Xavflarni boshqarish siyosati (keyinchalik matn bo‘yicha – Siyosat) “Navoiyazot” AJda (keyinchalik – Korxonada) xavflarni boshqarish tizimi (keyinchalik – XBT)ni samarali joriy etish va faoliyatini ta’minlash maqsadida ishlab chiqilgan.	<b>1.1</b> The Risk Management Policy (hereinafter – the Policy) has been developed to ensure the effective implementation and operation of the risk management system (hereinafter – RMS) within JSC “Navoiyazot” (hereinafter – the Company).
<b>2.</b> Siyosatning asosiy maqsadi – xavflarni boshqarishga kompleks yondashuvni o‘rnatish bo‘lib, u xalqaro standartlarga, zamonaviy amaliyotga va me‘yoriy talablarga muvofiq bo‘ladi. Ushbu Siyosatda Tashkilot tomonidan xavflarni boshqarish tizimining samarali faoliyatini ta’minlashga qaratilgan va amalga oshirilishi majburiy hisoblangan asosiy jarayonlar va tartiblar tavsiflanadi.	<b>1.2</b> The main objective of the Policy is to establish a comprehensive approach to risk management that aligns with international standards, best practices, and regulatory requirements. This Policy describes the key processes and procedures that are mandatory for implementation by the Company to ensure the effective functioning of the risk management system.
<b>2. QO‘LLANISH SOHASI</b>	<b>2. SCOPE OF APPLICATION</b>
<b>2.1</b> Ushbu Siyosat Tashkilotning barcha boshqaruv darajalari va tarkibiy tuzilmalariga, shuningdek, barcha muhim biznes-jarayonlar va loyihalariga tatbiq etiladi. Zarur hollarda, Siyosat qo‘shma korxonalar (QK) faoliyatida ham qo‘llanilishi mumkin, agar bu tomonlar tomonidan kelishilgan bo‘lsa.	<b>2.1</b> This Policy applies to all management levels and structural units of the Company, as well as to all material business processes and projects. Where necessary, the Policy may also be applied in the activities of joint ventures (JVs), provided this is agreed upon by the parties.
<b>2.2</b> Ushbu hujjatda keltirilgan prinsiplar, maqsadlar, vazifalar, tarkibiy qismlar va XBT ishtirokchilari mas’uliyati – minimal talablar sifatida ko‘rilishi kerak bo‘lib, ular Tashkilotning hajmi, murakkabligi va faoliyat turiga qarab kengaytirilishi mumkin. Tashkilot faoliyati kengayishi va murakkablashishi bilan xavflarni boshqarish jarayonlari ham yangi va paydo bo‘lgan xavflarni mos ravishda hisobga olish va nazorat qilish uchun qayta ko‘rib chiqilishi kerak, bu doimiy tahlil va baholash doirasida amalga oshiriladi.	<b>2.2</b> The principles, objectives, tasks, components, and responsibilities of participants in the RMS set forth in this document shall be considered as minimum requirements, which shall be scaled according to the size, complexity, and nature of the Company’s business. As the Company’s operations expand and become more complex, risk management processes shall also be modified to adequately address and control new and emerging risks within the framework of regular analysis and assessment.
<b>2.3</b> Tashkilotning barcha tashkiliy tuzilmalari xodimlari ushbu Siyosat talablarini to‘g‘ri bajarish uchun mas’uldir.	<b>2.3</b> Employees of all structural units of the Company are responsible for the proper implementation of the requirements of this Policy.
<b>2.4</b> Ushbu hujjat Korxonaning faoliyatiga tatbiq etiladigan qonunchilik talablarini o‘rni bosmaydi.	<b>2.4</b> This document does not replace any legislative or regulatory requirements applicable to the Company’s activities.

<b>3. ATAMALAR VA TA'RIFLAR</b>	<b>3. TERMS AND DEFINITIONS</b>

<p><b>XAVFLAR HAQIDA XABARDORLIK MADANIYATINI SHAKLLANTIRISH</b></p> <p>10.1 Xavflar bo‘yicha madaniyat— samarali xavflarni boshqarish jarayonining asosiy tayanchidir. Korxonada barcha darajalarda qaror qabul qilish jarayonining ajralmas qismi sifatida xavflarni boshqarishga nisbatan ongli munosabatni shakllantirishga intiladi. Korxonada rahbariyati xavflarni boshqarishga sodiqligini namoyon qiladi, yuqori rahbariyat qarorlari (tone at the top) orqali xulq-atvor me‘yorlari va xavflarga nisbatan munosabat tartiblarini belgilaydi.</p>	<p><b>BUILDING A CULTURE OF RISK AWARENESS</b></p> <p><b>10.1</b> A strong risk awareness culture forms the foundation for an effective risk management process. The Enterprise strives to foster a risk management culture in which risk management is viewed as an integral part of decision-making at all levels. The management demonstrates its commitment to risk management by setting the “tone at the top,” which defines behavioral standards and attitudes toward risks.</p>
<p><b>10.2</b> Korxonada xavflarni boshqarish madaniyati — xavflarni aniqlash, qabul qilish va boshqarish, shuningdek xavflar bilan bog‘liq qarorlar qabul qilishga oid me‘yorlar, yondashuvlar va xulq-atvorlar yig‘indisidir.</p>	<p><b>10.2</b> The risk management culture of the Enterprise encompasses a set of norms, behaviors, and approaches that guide how risks are identified, accepted, managed, and how risk-related decisions are made.</p>

Yuqori rahbariyat xavflarning umumiy manzarasini va strategik ustuvor yo‘nalishlarni belgilaydi, operatsion bo‘linmalar esa yuzaga kelayotgan xavflar bo‘yicha batafsil ma’lumot orqali o‘z hissasini qo‘shadi. Senior management defines the overall risk landscape and strategic priorities, while operational units contribute through detailed information about emerging risks. This comprehensive approach ensures a holistic understanding of the risks faced by the Enterprise.</p>
<p><b>12.2</b> Xavflarni aniqlash jarayonining asosiy maqsadi — Korxonaning strategik, operatsion va ichki me’yoriy talablariga oid maqsadlariga sezilarli ta’sir ko‘rsatishi mumkin bo‘lgan barcha potentsial salbiy hodisalarni, shuningdek, imkoniyatlarni aniqlashdan iborat.</p>	<p><b>12.2</b> The primary objective of the risk identification process is to identify all potential adverse events as well as potential opportunities that may significantly affect the achievement of the Enterprise’s strategic, operational, and regulatory objectives.</p>
<p><b>12.3</b> Xavflarni aniqlash jarayoni risk egalari va tegishli bo‘linmalarni jalb qilgan holda so‘rovnomalar va boshqa xavflarni aniqlash hamda baholash usullari orqali amalga oshiriladi, bu esa barcha potentsial xavflar bo‘yicha kompleks tasavvur olish imkonini beradi. Barcha xavflar haqidagi ma’lumotlar Xavflar reestriga qayd etiladi, bu esa aniqlangan xavflar va ularning parametrlari bo‘yicha tizimli hisob yuritishni ta’minlaydi. Xavflar reestri xavflarni tahlil qilish, baholash va boshqarish hamda ularning dinamikasi va kamaytirish choralarining samaradorligini monitoring qilish uchun asosiy vosita hisoblanadi.</p>	<p><b>12.3</b> The risk identification process is carried out with the involvement of risk owners and relevant departments through surveys and other risk identification and assessment methods, providing a comprehensive view of all possible risks. All information about identified risks is recorded in the Risk Register, ensuring a structured record of all risks and their indicators. The Risk Register serves as the main tool for further analysis, assessment, and management of risks, as well as for monitoring their dynamics and the effectiveness of mitigation measures.</p>
<p><b>12.4</b> Xavflarni aniqlashda ichki tekshiruvlar, auditlar, komplaens-baholashlar, shuningdek, tarmoq va xalqaro tajriba natijalari ham inobatga olinadi. Korxonada faoliyati davomida yangi xavflar aniqlangan sari Xavflar reestri to‘ldirib borilishi mumkin.</p>	<p><b>12.4</b> The identification process also takes into account the results of internal reviews, audits, compliance assessments, as well as industry and international best practices. The Risk Register may be updated as new risks are identified in the course of the Enterprise’s operations.</p>
<p><b>12.5</b> Xavflarni aniqlash natijalari muntazam ravishda qayta ko‘rib chiqiladi va yangilanadi (hisobot shakllantirish jarayonida har chorakda kamida bir marta yoki ichki/tashqi muhitda sezilarli o‘zgarishlar sodir bo‘lganda —tez-tez).</p>	<p><b>12.5</b> The results of risk identification are regularly reviewed and updated (at least once per quarter as part of reporting preparation, or more frequently in case of significant internal or external changes).</p>

<b>13. XAVFNI BAHOLASH</b>	<b>13. RISK ASSESSMENT</b>
13.1 Xavflar aniqlangandan so'ng Korxonada xavflarni boshqarish jarayonining keyingi bosqichi — ularning ta'siri va ehtimolini baholashdir. Xavflarni baholash Korxonaning xavf profilini har tomonlama tushunishni va asoslangan qarorlar qabul qilishni qo'llab-quvvatlashga qaratilgan. Korxonada xavflar haqida muvozanatli tasavvur hosil qilish uchun sifat va miqdoriy baholash usullarining uyg'unlashgan kombinatsiyasidan foydalanadi.	13.1 After the identification of risks, the next stage of the Enterprise's risk management process is the assessment of their impact and likelihood. The purpose of risk assessment is to ensure a comprehensive understanding of the Enterprise's overall risk profile and to support well-informed decision-making. The Enterprise applies a combination of qualitative and quantitative assessment methods to provide a balanced view of risks.
13.2 Korxonada ta'sir va ehtimollik kombinatsiyasini vizuallashtirish uchun Xavflar xaritasi kabi grafik vositalardan foydalanadi. Xavflar xaritasi ustuvorliklarni samarali ko'rsatishga va xavflar profilining yagona tasvirini shakllantirishga yordam beradi, bu esa boshqaruv qarorlarini qabul qilish jarayonini sezilarli darajada yengillashtiradi.	13.2 The Enterprise uses graphical tools such as the <i>Risk Map</i> to visualize the combination of impact and likelihood of risks. The Risk Map helps effectively visualize prioritization and establish a unified view of the risk profile, which significantly facilitates the management decision-making process.
13.3 Alohida tarkibiy bo'linmalar darajasida baholash o'tkazilgandan so'ng eng muhim xavflar konsolidatsiya qilinadi va Korxonaning xavflar reestriga kiritiladi. Konsolidatsiya Korxonada darajasida monitoring va boshqarish talab qilinadigan asosiy xavflarning yagona ro'yxatini shakllantirish uchun amalga oshiriladi. Xavflar reestri har yili Kuzatuv kengashi tomonidan ko'rib chiqiladi va tasdiqlanadi.	13.3 After conducting assessments at the level of individual structural units, the most significant risks are consolidated and recorded in the Enterprise Risk Register. This consolidation is carried out to create a unified list of key risks that require monitoring and management at the Enterprise level. Risk register is reviewed and approved annually by the Supervisory Board.
13.4 Reestriga kiritilgan barcha xavflar xavflar xaritasida aks ettiriladi, bu esa ularning ehtimolligi va ta'sir darajasini inobatga olgan holda tuzilgan ko'rinishda taqdim etilishini ta'minlaydi.	13.4 All risks entered into the Risk Register are reflected on the Risk Map, ensuring their structured presentation based on likelihood and impact levels.
<b>14. XAVFLARGA JAVOB CHORALARI</b>	<b>14. RISK RESPONSE</b>
14.1 Korxonada xavflarga munosabat bildirish ularni boshqarish uchun tegishli strategiyalarni tanlash va amalga oshirishni nazarda tutadi. Xavflarni boshqarish strategiyalari aniqlangan xavflarning ehtimoli va/yoki ta'sirini kamaytirishga qaratilgan	14.1 Risk response at the Enterprise involves the selection and implementation of appropriate strategies to influence risks. Risk management strategies consist of measures and actions aimed at reducing the likelihood and/or impact of identified risks. The main objective of these

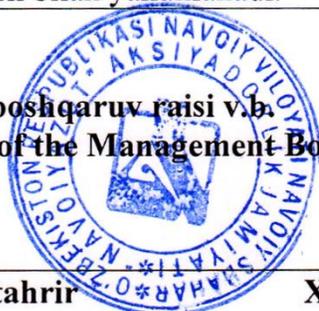

<p>chora-tadbirlar va harakatlar majmuasidir. Ushbu strategiyalarning asosiy vazifasi — potentsial xavflarning salbiy oqibatlarini minimallashtirish, yuzaga kelayotgan imkoniyatlardan foydalanish va Korxonaning noaniqlik sharoitida bardoshli hamda moslashuvchan bo‘lish qobiliyatini oshirishdir.</p>	<p>strategies is to minimize the negative consequences of potential risks, leverage emerging opportunities, and enhance the Enterprise’s ability to cope with uncertainty while remaining resilient and adaptable.</p>
<p><b>14.2 Korxonada xavflarni boshqarishning quyidagi asosiy strategiyalarini qo‘llaydi:</b></p> <ul style="list-style-type: none"> <li>• <b>Xavfni qabul qilish</b> — aniqlangan xavf Korxonada tomonidan belgilangan limitlar doirasida bo‘lsa qo‘llaniladigan strategiya. Bu yondashuv xavf ehtimoli yoki ta’sirini kamaytirish uchun qo‘shimcha choralar ko‘rmasdan, risk oqibatlarini ongli ravishda qabul qilishni nazarda tutadi.</li> <li>• <b>Xavfdan qochish</b> — agar aniqlangan xavf belgilangan chegaralardan yuqori bo‘lib, Korxonada uchun sezilarli tahdid tug‘dirsa qo‘llaniladi. Ushbu strategiya xavf manbasini butunlay bartaraf etish va uning kelajakda yuzaga kelishining oldini olish bo‘yicha proaktiv choralarini o‘z ichiga oladi. Bunda xavfdan qochish choralarini xavfsizlik va strategik rivojlanish o‘rtasidagi muvozanatni inobatga olishi zarur, chunki ortiqcha qochish innovatsiyalarni cheklashi mumkin.</li> <li>• <b>Xavfni o‘tkazish</b> — xavf uchun javobgarlikni uchinchi tomonlarga o‘tkazish strategiyasi bo‘lib, odatda sug‘urta, outsorsing yoki maxsus shartnomalar orqali amalga oshiriladi. Bu strategiyaning asosiy maqsadi — riskning ehtimolini kamaytirmasada, uning moliyaviy oqibatlaridan Korxonada ta’sirchanligini kamaytirishdir.</li> <li>• <b>Xavfni kamaytirish</b> — aniqlangan xavflarni minimallashtirish bo‘yicha chora-tadbirlarni amalga oshirishni nazarda tutadi. Xavflarni kamaytirishga qaratilgan ushbu yondashuv Korxonada jarayonlarni doimiy takomillashtirish va barqarorlikni oshirish madaniyatini qo‘llab-quvvatlaydi.</li> </ul>	<p><b>14.2</b> The Enterprise applies the following key risk management strategies:</p> <ul style="list-style-type: none"> <li>• <b>Risk Acceptance</b> – a management strategy applied when the identified risk falls within the Enterprise’s established limits. This strategy involves a conscious decision to accept the consequences of the risk without implementing additional measures to reduce its likelihood or impact.</li> <li>• <b>Risk Avoidance</b> – applied when the identified risk exceeds established limits and poses a significant threat to the Enterprise. This strategy involves proactive actions aimed at eliminating the source of the risk and preventing its occurrence in the future. At the same time, when avoiding risk, it is important to maintain a balance between safety and strategic development, as excessive avoidance may limit innovation.</li> <li>• <b>Risk Transfer</b> – involves transferring the responsibility for managing a risk to third parties, typically through insurance, outsourcing, or special contractual agreements. The main purpose of this strategy is to reduce the financial exposure of the Enterprise by transferring responsibility to a more competent party. It should be noted that risk transfer does not reduce the probability of occurrence but mitigates the Enterprise’s exposure to financial consequences if the risk materializes.</li> <li>• <b>Risk Mitigation (Reduction)</b> – involves implementing measures to minimize identified risks. By focusing on risk reduction, the Enterprise seeks to promote a culture of continuous process improvement and enhanced resilience.</li> </ul>
<p><b>14.3</b> Xavflarni boshqarish bo‘yicha chora-tadbirlarning kompleks va strategik qo‘llanishi Korxonaning barqarorligini oshirishga,</p>	<p><b>14.3</b> The comprehensive and strategic application of risk management measures contributes to strengthening the Enterprise’s</p>

<b>15 XAVFLARNI MONITORING QILISH VA HISOBOT BERISH</b>	<b>15. RISK MONITORING AND REPORTING</b>
15.1 Korxonada xavflar bo'yicha hisobot tizimi barcha boshqaruv darajalari o'rtasida xavflar to'g'risidagi ma'lumotlarning shaffof va o'z vaqtida almashinuvini ta'minlashga qaratilgan. Bu rahbariyatga xavflarning joriy holati bo'yicha amaldagi ma'lumotlarga asoslangan holda asosli qarorlar qabul qilishga yordam beradi.	<b>15.1</b> The risk reporting system at the Enterprise is designed to ensure transparent and timely communication of risk information across all organizational levels. This enables management to make well-informed decisions based on up-to-date data regarding the current risk landscape.
15.2 Ichki hisobotlilik risk egalari tomonidan XBBga muntazam ravishda xavflar bo'yicha hisobotlar taqdim etilishini nazarda tutadi. Shundan so'ng XBB ma'lumotlarni konsolidatsiya qiladi va ularni tegishli organlarga ko'rib chiqish uchun taqdim etilishini ta'minlaydi.	<b>15.2</b> Internal reporting involves the regular submission of risk reports by risk owners to the Risk Management Department (RMD). The RMD consolidates this information and ensures that it is presented for review to the appropriate governing bodies.
15.3 Kuzatuv kengashi, Audit qo'mitasi, Boshqaruv va Xavflarni boshqarish qo'mitasiga hisobotlar XBB boshlig'i tomonidan taqdim etiladigan har choraklik hisobotlar orqali amalga oshiriladi. Ushbu hisobotlarda asosiy xavflar, ularni boshqarish strategiyalari, KRP bo'yicha ma'lumotlar, shuningdek xavf-appetiti va xavf-tolerantlik darajalarining buzilishi to'g'risidagi axborot yoritiladi.	<b>15.3</b> Reporting to the Supervisory Board, Audit Committee, Management Board, and Risk Management Committee is carried out through quarterly reports submitted by the Head of the RMD. These reports highlight key risks, the strategies applied to manage them, as well as information on Key Risk Indicators (KRIs) and any breaches of risk appetite and tolerance levels.
15.4 Korxonada xavflarni monitoring qilish va hisobotlilik xavflarni boshqarish tizimining muhim qismi bo'lib, tahdidlarni proaktiv aniqlashni va ularni kamaytirish choralari samaradorligini doimiy takomillashtirishni ta'minlaydi.	<b>15.4</b> Risk monitoring and reporting at the Enterprise form an integral part of the risk management system, ensuring proactive identification of emerging threats and continuous improvement of mitigation measures.
<b>16. XAVFGA APPETETI</b>	<b>16. RISK APPETITE</b>
16.1 Korxonaning xavf-appetiti — bu Korxonaning strategik va operatsion maqsadlarga erishish uchun mavjud resurslari va imkoniyatlarini inobatga olgan holda qabul qilishga tayyor bo'lgan xavf darajasini belgilaydi.	<b>16.1</b> The Enterprise's risk appetite defines the level of risk it is willing to accept, taking into account its resources and capabilities to achieve strategic and operational objectives

The risk appetite serves as a benchmark for determining the limits of acceptable risk and helps avoid activities that could jeopardize the Enterprise's sustainability or reputation.</p> <p><b>16.3</b> The acceptable level of risk is developed in alignment with the Enterprise's budget plan and strategic objectives. It provides a unified framework and comparable metrics that enable the Supervisory Board and the Management Board to better understand and evaluate the types and levels of risks the Enterprise is willing to accept.</p>
<p><b>16.4.</b> Xavflarni xavf -appetiti, tolerantlik darajalari va asosiy xavf ko'rsatkichlari (KRI) asosida baholash hamda monitoring qilish yondashuvlari <i>Xavf-apetiti va xavf-tolerantlikni aniqlash metodikasida</i> bayon etilgan.</p>	<p><b>16.4</b> The approaches to assessing and monitoring risks based on risk appetite, tolerance levels, and key risk indicators (KRIs) are described in the <i>Methodology for Defining Risk Appetite and Risk Tolerance</i>.</p>
